Military Records and the 1973 Fire

- On July 12, 1973, a disastrous fire at the National Personnel Records Center (NPRC) destroyed approximately 16-18 million Official Military Personnel Files (OMPF).

- The records affected:

Branch	Personnel and Period Affected	Estimated Loss
Army	Personnel discharged November 1, 1912 to January 1, 1960	80%
Air Force	Personnel discharged September 25, 1947 to January 1, 1964 (with names alphabetically after Hubbard, James E.)	75%

- No duplicate copies of these records were ever maintained, nor were microfilm copies produced. Neither were any indexes created prior to the fire. In addition, millions of documents had been lent to the Department of Veterans Affairs before the fire occurred. Therefore, a complete listing of the records that were lost is not available.
- However, in the years following the fire, NARA collected numerous series of records (referred to as Auxiliary Records) that are used to reconstruct basic service information.

- Individual Flight Records are microfilm records that cover primarily officers and aviation cadets.
- The records are in order by year, then alphabetically by last name.
- They are used primarily for records reconstruction purposes.
- The record may include the person's name, service number, rank, assigned unit, station, aircraft type, mission symbol, and cumulative flying time totals.
- Formats may vary slightly depending on the year.

- An individual will have a flight record card in every year that he or she flew. Each card contains information about flying time and flight training that year, plus the cumulative totals for previous years.
- To request a Flight Record, complete NA Form 14001, showing the name (last, first, and middle initial) and the year flown.
- For **only** the cumulative career total information, complete the NA Form 14001 for only the final year of flying time (if known).
